

Magicians

Compere/assistant will introduce the magician

Bow

Assistant will hand over the paper

First A4 papersheet

Add another A4 sheet explain that this is the same size, shape, density.

Explain that through the power of your thought/magic you will make the first sheet reach the ground first

Crumple the first sheet

Drop flat and crumpled sheet together

Bow

The assistant will applaud

Take crumpled sheet and flat A3sheet

Show A3 sheet explain twice size twice the weight still the same density

Explain that because you are a very powerful magician you can control the fall so that the heavier sheet will reach the ground first

Drop

Bow

Assistant leads applause

Enter Scientist calling FRAUD and whatever else you think appropriate

Explain that it is

The science of Forces that controls the speed at which the paper falls

Use the phrases

Air-resistance makes the paper---

The bigger the surface area the more ---  
so long as the density is the same.
