

Assessment for Learning in science lessons INSET

Notes for trainer

There is a flipchart to support the session. Several pages contain trainers notes which can be accessed as shown below.

The session includes the teachers carrying out an activity. The investigation suggested is adding a range of solids to water. The following resources will be required for each group of four.

3 pots labelled sample A-C

The pots contain three different solids which may or may not dissolve.

Bottle of water

Small plastic cup (to carry out the test in)

Large beaker or cup (for emptying the slops)

Cloth for wiping out the small cup

Teaspoon

Magnifying glass
